

Global Issues in Logistics & Transport

The Chartered Institute of Logistics & Transport has over 33,000 Members, working in over 100 countries around the world.

Each year we ask them to share the Top 5 issues affecting them and their activities in Logistics & Transport. We collate and rank the results and present them at the Annual CILT International Convention.

The next International Convention will be in Malta in May¹. We present the results of this years survey at the CILT~Malta International Conference on Wednesday 5th May and you could be there!

In 2009 we had responses from across the globe. You were concerned with issues that ranged from regulation to congestion, talent management to HIV/AIDS, energy prices to climate change. What are your most important issues this year?

In the 2010 survey we are also asking you to take a strategic look forward and also try a little long range forecasting; What do you think will be the Top 5 issues in the lead up to 2015 and then in ten years time, in 2020?

Over the next few years it will be fascinating to see how some concerns become more prevalent, while others fall away. Will your predictions be accurate or will we be surprised by new issues over the next decade?

Please feel free to share this survey with you friends, peers and colleagues and get them to participate. Thank you also to all those organisations who will be passing out to all their members, managers, graduates and networks

You don't have to be a member of the CILT to participate and if you provide an email address we'll send you the results.

Thank you very much for your contribution and passing this survey on to other Logistics & Transport professionals. We look forward to sharing your collective Top 5 Issues for Logistics & Transport in 2010 at the CILT Convention in Malta.

¹ Go to www.ciltmalta.org for more details of the 2010 Convention.

We will also pick one response from all your submissions and provide that lucky person with complementary registration at the Convention.

Not only do you get to make a contribution but you might also get to hear the results in Valetta!

Please submit your responses to **bernard.auton@ciltinternational.org** no later than Sunday 25th April.

Thank you very much for your contribution and we look forward to seeing you in Malta!

Bernard Auton FCILT
